

# SEA TURTLES

## FUN FACT FOR KIDS

### Ancient Creatures

Sea turtles are some of the oldest creatures on Earth, having been around for more than 100 million years.

### Species Diversity

Seven sea turtle species: loggerhead, green, hawksbill, leatherback, Kemp's ridley, olive ridley, flatback.

### Shell Variety

While all sea turtles have shells, the shells can vary greatly in shape and size among the different species.

### Marine Ecosystem

Sea turtles are essential for marine ecosystems, supporting seagrass and coral reefs and providing food for other marine life.

### Ancient Reptiles

Sea turtles have been around for more than 100 million years, dating back to the time of the dinosaurs.

### Long Lifespan

Sea turtles can live up to 50-100 years, with some even living longer in the wild.
