## Fun fact for kids

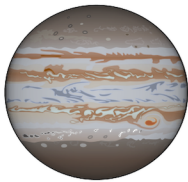

The Sun is a star and is over 4.5 billion years old.

One day on Venus is longer than one year on Venus!

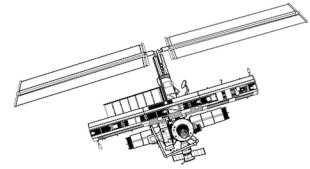

There are more stars in the universe than grains of sand on all the Earth's beaches.

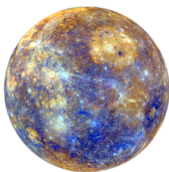

A day on Jupiter is just under 10 hours long.

The footprints left by astronauts on the Moon will remain there for millions of years.

The International Space Station (ISS) orbits Earth about 16 times a day.

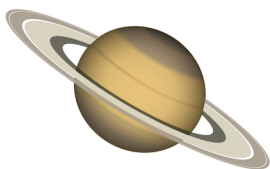

A year on Mercury is just 88 Earth days long.

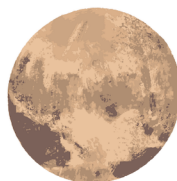

One million Earths could fit inside the Sun.

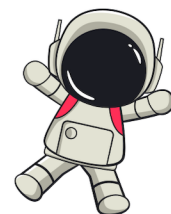

Neptune has winds that blow at over 1,200 miles per hour, the fastest in the solar system.

Saturn's rings are made of ice and rock particles.

If you could fly a plane to Pluto, it would take over 800 years!

Astronauts grow taller in space because of the lack of gravity pulling them down.
