

Uranus

Fun fact for kids

Uranus is the seventh planet from the Sun.

It's known as the "sideways planet" because it rotates on its side.

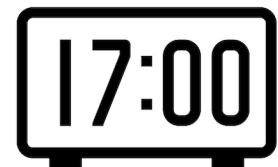

Uranus has a blue-green color due to methane gas in its atmosphere.

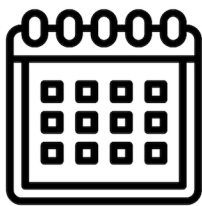

It's the coldest planet in our solar system.

Uranus has 27 known moons

A day on Uranus is about 17 hours long.

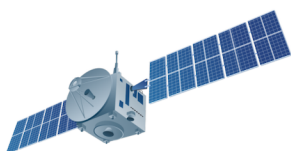

It takes Uranus about 84 Earth years to orbit the Sun.

The planet was discovered by astronomer William Herschel in 1781.

Uranus is four times wider than Earth.

The Voyager 2 spacecraft is the only one to have flown by Uranus.

Uranus has a rocky core surrounded by water, ammonia, and methane ices.

Uranus is named after the Greek god of the sky.
