

# ANTS

## Fun fact for kids

Ants live in colonies with specific roles: foraging, caring for young, and defending the nest.

Ants achieve remarkable strength through teamwork, lifting objects many times their own weight.

Ants talk with scents, touch, and vibes to show where food is and warn of danger.

Ants thrive in diverse habitats worldwide, totaling over 12,000 species.

Ants live short lives, but colonies can thrive for decades or even centuries.

They collect organic material to grow fungi, which becomes their main food source.

Ants are incredibly strong for their size. They can carry objects up to 50 times their own body weight.

There are more than 12,000 known species of ants, and they are found almost everywhere on Earth.
